PROFILE

Bandung Institute of Technology undergraduate student specializing in Software Engineering and Machine Learning. Seeking a challenging role to leverage a strong aptitude for learning and a passion for building efficient and intelligent software solutions.

WORKING EXPERIENCE

Database Laboratory

Laboratory Assistant

Bandung, Indonesia

July 2024 - Present

- Developed, distributed, and graded practical database assignments for over 150 students.
- Designed database schemas and project specifications for the course's practical component.
- Proctored examinations and maintained academic standards.

Terra Discover

Software Engineer

Jakarta, Indonesia

June 2025 – September 2025

- Developed a hotel reservation chatbot using the n8n automation engine.
- Built an internal admin site for chatbot monitoring using a React micro-frontend with Go and Firebase backend.
- Designed Python RAG and QA pipelines for document querying using prompt chaining.

Wardaya College

Full Stack Developer

Jakarta, Indonesia

June 2024 – September 2024

- Updated a Content Management System (CMS) by migrating the backend to GraphQL and rebuilding the frontend with React.
- Created a dashboard for the Education Consultant Division for data centralization and real-time analytics utilizing React and Go

ORGANIZATIONAL EXPERIENCE

ITB Fair 2024

Front-end Web Developer

Bandung, Indonesia

January 2024 – March 2024

- Built responsive web applications using Next.js, TypeScript, and Tailwind CSS.
- Led platform migration to Next.js to unify the codebase and enable server-side rendering

EDUCATION

Bandung Institute of Technology

Informatics Engineering (3.99 GPA / 121 Credits)

Bandung, Indonesia

2022 – Present

- Relevant coursework :** Artificial Intelligence, Machine Learning, NLP, Computer Vision, Distributed Systems, Database Systems, Web Application Development.

SKILLS

Programming Languages

- Proficient: Python, JavaScript/TypeScript, Go, SQL
- Familiar: Java, PHP, C++, Kotlin

Artificial Intelligence & Machine Learning

- Libraries/Frameworks: PyTorch, TensorFlow, Scikit-learn, OpenCV
- GenAI & NLP: HuggingFace Transformers, Retrieval-Augmented Generation (RAG), Finetuning, Prompt Engineering
- Tools & Platforms: n8n, LangChain, LangGraph

Web Development (Full Stack)

- Frontend: React, Next.js, Tailwind CSS, ShadCN, MantineUI
- Backend: Go, Node.js (Express.js), GraphQL, FastAPI, gRPC, Django
- Supporting Tech: Redis, JWT, AWS

Mobile Development

- React Native, Jetpack Compose

Databases & DevOps

- Databases: PostgreSQL, MySQL, MongoDB, SQLite, Firebase, Vector Databases (Qdrant)
- Tools: Git, Docker, Kubernetes, GitHub Actions (CI/CD)

Languages

- Indonesian (Native)
- English (Fluent)
- Mandarin (Conversational)

HONORS AND AWARDS

First Place, Data Analysis Competition

Informatics Festival (IFest) 2024

Bandung, Indonesia

- Secured first place by developing a high-accuracy model ($R^2 \approx 1.0$) using Scikit-learn/XGBoost to forecast AI workloads.
- Identified human task allocation as the most significant predictor of AI workload.
